3RD INTERNATIONAL CONFERENCE

ON

ADVANCED TECHNOLOGIES FOR INDUSTRIAL POLLUTION CONTROL (ATIPC-2022)

(THROUGH HYBRID MODE)

December 21 – 23, 2022

ORGANIZED BY

Civil Engineering Department
Indian Institute of Engineering Science and
Technology, Shibpur
(Formerly Bengal Engineering and Science
University, Shibpur)
Howrah – 711 103
West Bengal, India

ABOUT THE CONFERENCE

A large number of pollutants in air, water and soil medium are generated due to industrial activities. The concentration of all such pollutants has been increasing day by day, causing adverse effects to the biosphere. Thus inadequate waste management of various industries results in a challenge to the ecological sustainability. In spite of in-plant control measures, a number of industries are unable to comply with the prescribed standards for effluent discharge, stack emission and solid waste disposal. In view of that, various advanced technologies need to be developed, which will support efficient waste management practice leading to minimal liquid and solid waste discharge as well as lowest emission to the atmosphere. However, it now becomes a serious concern to all sectors of industries to satisfy environmental standard under a competitive business market. In order to address the above issues and to explore the innovative technologies in the arena of industrial pollution control, the 1st and 2nd International Conference on Advanced Technologies for Industrial Pollution Control (ATIPC – 2018 and ATIPC – 2020) was held in 2018 and 2020 respectively. The present international conference (ATIPC – 2022) is the Third version of the earlier conferences, which will be held in Hybrid (Online and Offline) mode.

The conference is oriented to create an effective forum for the environmental scientists, engineers, technologist and the industry persons for sharing their research initiatives and real-life experience through oral presentation of the technical papers on relevant focus themes.

CONFERENCE THEMES

The International Conference (ATIPC-2022) is planned to include the following themes.

- Water quality monitoring and treatment in industrial area
- Industrial effluent treatment, reuse and conservation
- Monitoring of industrial emission and control
- Industrial solid waste management
- Handling and disposal of hazardous waste
- Role of EIA and EMP in industrial pollution control
- Case Studies on industrial pollution control
- Industrial noise control and radioactive waste management
- Innovative technologies in industrial waste management
